SHORTS ON SEPTEMBER
WHEAT HASTEN TO COVER.BUYING GIVES STRENGTH
TO MARKET.CORN DULL AND FEATURELESS—Cash
Situation Continues Satisfactory to Buils.

Covering by shorts on Sept. wheat gave a firm tone to the market last week. Lower estimates of the country's crop and unfavorable weather reports, coupled with falling selling by farmers, caused some under-arrangement, but it was felt that supplies would not be sufficient to meet with Sept. contracts. The result was buying which sustained the entire wheat market. Corn was also strong, and dragged throughout the entire session. The cash situation continues strong.
